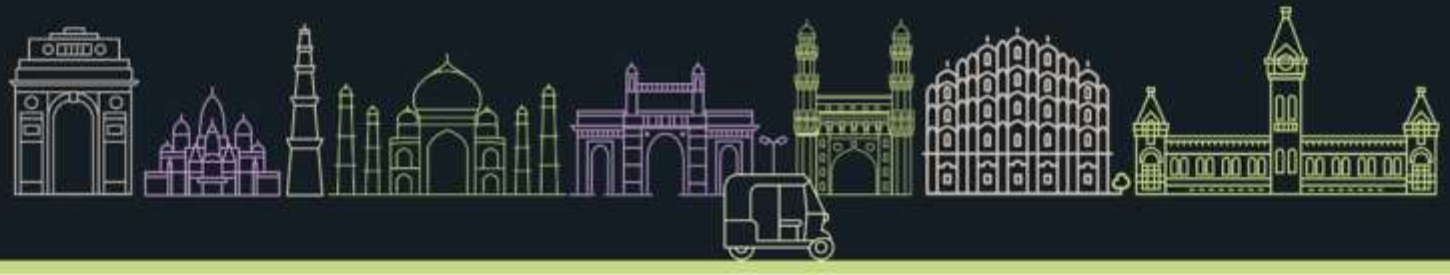
AI for Bharat Hackathon

Powered by aws



Team Name : Techjays

Team Leader Name : Saravana Rajan

Problem Statement : AI for Healthcare & Life Sciences

SwasthyaMitra: One App, Three Critical Solutions.

A voice-first, multilingual platform that helps Indians navigate healthcare in their own language.

Lab Samjho

Lab Report Interpreter.
Scan & Listen.

Care Guide

Health Assistant.
Voice Q&A.

MedScribe

Doctor Documentation.
Auto-Clinical Notes.

Brief about the Idea:

SwasthyaMitra: A unified AI-powered platform that helps users navigate healthcare in their native language and automates documentation for doctors.

The 3 Core Features:

1. Lab Samjho: Explains lab reports in simple language.
2. Care Guide: A voice-based health assistant for medical queries.
3. MedScribe: Automates clinical notes for doctors

Features offered by the solution

Lab Samjho

- Photo capture of any lab report
- AI analysis (Normal | Borderline | Abnormal)
- Simple audio explanation in Indian languages

Care Guide

- Voice input/output in local dialects
- Guidance on symptoms and medications
- Conversation memory for follow-up questions

MedScribe

- Doctors speak naturally in Hindi/Tamil/Telugu
- Auto-generation of structured SOAP notes in English
- Saves 2-3 hours of documentation time daily

1. How is it different?

- **Voice-First:** Supports 10+ Indian languages using voice, unlike text-only apps.
- **Unified Platform:** Combines patient tools (Lab/Health queries) and doctor tools (Documentation) in one app.

2. How does it solve the problem?

- **For Patients:** Breaks language barriers by explaining medical info via audio.
- **For Doctors:** Saves 2–3 hours daily by automating structured notes.

3. USP (Unique Selling Proposition):

- **Designed for Bharat:** Optimized to work on basic smartphones with a simple UI, making it accessible even to users with limited technical skills
- **Accessible:** Works for low-literacy users through speech-to-speech interaction.

Process flow diagram for Patient & Doctor

User Experience Philosophy: "Designed for Bharat"

The Patient Journey

Open App & Select Language (e.g., Hindi)

Tap Large 'Camera' or 'Mic' Button

AI Processing (Invisible to User)

Hear Audio Explanation & See Visual Status (Green/Red)

The Doctor Journey

Open MedScribe Module

Dictate Consultation Naturally

Review Auto-Generated English Notes

Print Prescription & Instructions

Serverless Architecture & Implementation Stack

A 100% serverless AWS design ensures 'pay-as-you-go' efficiency with zero idle cost.
